EDICAR PLASTICOS was established with an accumulated experience of more than 30 years in the construction and waterproofing sector, and in the last 15 years, we focused on the swimming pool industry through our brand CEFIL POOL.

The CEFIL POOL reinforced membrane, is adaptable to any type of swimming pool, regardless of size, location or use, as well as to any surface (metal, concrete, polyester, etc.) guaranteeing a minimum watertightness of 10 years.

Our reinforced membrane is manufactured in our facilities of VITORIA-GASTEIZ (SPAIN), complying with all the requirements in accordance with the European Standard UNE 15836-2 applicable to this type of material.

For the 2024 season, in addition to our already traditional collections, **CLASSIC** Collection and

**EXPERIENCE** Collection, we present the new **PASSION** Collection, which through the smooth 3D texture we have applied achieves the anti-slip grade C certificate, offers the great beauty to the entire range of classic colours and prints.

Our **NATURE** Collection and **ONYX** Collection, both with anti-slip Grade C and Class 3 certificates, with prints and 3D textures that will satisfy the most demanding customers, based in the elements of nature and according to the last architectural trends.

Finally, for those customers looking for the most luxurious finishes, we launch for this 2024 season the new **KERAMIK** Collection, being a large format stoneware look-a-like design with hyperrealist finishing. The result is a harmonic, vanguardist and integrable collection, where the difference with real materials turns imperceptible.
